ABCHA 8200R ECO

Replenisher for developer ABCHA 8200 ECO

Replenisher formulated, developed and designed to keep all properties of ABCHA 8200 ECO developer. ABCHA 8200R ECO reduces the use of chemistry and allows recycling less quantity of product.

Properties

- **DURABILITY:** Its specific formulation permits high productivity in square meters developed.
- **CLEANING:** Its dissolution capability reduces the accumulation of emulsion in the filters, rollers and bath tank, keeping them cleaner.
- **Non-aggressive** to the anodizing layer of the plates.
- Buffered agents to minimize the aggression to the image area.
- It contains corrosion inhibitors.
- Low replenishment rate, reduces the consumption and recycling.
- Conductivity: 89 mS/cm.

How to use

Replenishment rate	50 – 70 ml/m ²
Anti-ox Standby ON	40 – 60 ml/h
Anti-ox Standby OFF	40 – 60 ml/h

Considerations

- Initial bath's charge must be always with developer ABCHA 8200 ECO.
- Make sure about the correct replenishment dose.

Packaging

20 liters | 1000 liters | Other packaging available under request.
