PROCESSOR ROLLER CLEANER

Product for the cleaning and preventive maintenance of the rollers of the processors of offset plates.

Properties

- Removes the residues of colourants and plate coatings / deposited onto the rollers and development bath of the processor.
- Liquid solvent mixture, with high dissolving power for slightly polar substances such as oils, greases, waxes, resins, etc.
- Use in manual.
- It also has degreasing qualities.
- Does not damage the rubber covering of the rollers, even in the case of frequent washes the rollers retain a suitable tackiness.
- With corrosion inhibitors.
- Like solvents, it is advisable to store it in well-ventilated areas away from sources of ignition.
- No foaming product.

How to use

The product is ready to use. Wet a cloth and apply over rollers and bath until the complete removal of the residues. After use, wash with Water until the complete removal of all the cleaning emulsion residues .
