UNIGUM

Finishing gum for all types of plates

Low viscosity protection gum for offset plates. Direct use.

Properties

- Excellent protection of the plate.
- Eliminates scratches by plate handling.
- Very good wetting.
- Removed very easily and leaving no residue.
- Image areas do not lose their ink-up capacity.
- Permanent elasticity.
- Use Unigum for short storage periods, no more than 15 days
- Adjusted the slightly acidic pH suitable for the oxide layer.
- Does not attack the aluminum oxide or the emulsion of the plates.
- Valid for both manual and automatic processor.
- With corrosion inhibitors.

How to use

Automatic processor: Ready to use without dilution.

Manual use: Spread a small amount on the plate surface with a sponge or cloth, and stretch the product as much as possible to avoid accumulations on the printing area.
